Disclaimer:

With sincerity one should respect all religions and religious Faiths. Throughout this book there is no deliberate intention to hurt the sentiments of any particular religion and defame any members of a particular community, organisation and institution. In my deep study and research all views presented are basically exhibited out of personal self-study with a view to demand harmony, peace, tranquillity towards a positive attitude about religion.

Preface:

This book entitled “All about the Religion” is humble research and presentation as done through self-study, as one experiences from time to time, as available from historical facts, evidences, archaeology, mythology, legends, various thinkers and experts of our society in the field of religion.

Many important subjects of significance have been laid down in detail which would help readers gain knowledge and essence on concept of religion. Seekers are requested to not only read this book once but humbly urged to “Study the book” with interest and to take full advantage of its inner secrets and understanding of what religion actually means, as are explained in relation to its objects of research.

Those who will find this book helpful, credit transfers to my late parents who bought me into this world, without whose blessings my desire to present this knowledge, yearning from many years, would not have been possible.

It is not only blessing of my parents who desired my human birth but mercy of my mentor and guide who opened my eyes, without both, I would not had been enlightened about religion. I would have remained living in dark regions of religion.

Beyond our designated religion attached to our body, mind and consciousness as being a Hindu, Christian or Muslim there is an higher knowledge to comprehend about religion, which only a true guide who

appears in one's life in some kind of form, whom we may address him as God, Saviour, Mentor and Teacher, who shows one the true path in our human form of life. Such a guide is very rare to find in this age.

Religion begins with our living parents, people and humanity around us, being the primary Domain of one's religion and ends with our consciousness at the time of our death. At the time of death we are nobody, even being designated as Hindu, Muslim, Christian, Jew, Sikh, Bodh etc., cremated or burnt according to traditional methods and religious thinking.

There is serious necessity to study about true religion and understanding the purpose of religion in its true spirit, not with a superstitious belief.

I shall be presenting in the book various topics on religion in relation to Creation, Nature, Faith, God, Language, Country, Culture and Occupations the primary domains of religion and the results derived out from them into our hearts known as belief, feelings, experiences, emotions, relationships, behaviour, duty, humanity, way of life, codes, laws, morality, righteous and philosophy of life etc. in relation to humanity are one's true religion.

Man, Woman, Mentor, Teacher and Guide truly, play a very important role in the other part in the domain of religion in relation to humanity. The presentation of the book is in simple English language to benefit all those interested in this subject. In the first volume I have covered on introduction series "All about the Religion". I trust this book would be found most useful for readers with positive thinking and will benefit many.

S N DAS

Introduction:

What few are thinking today many will be thinking tomorrow? Many have already started thinking therefore writing to share the thoughts. It will be a humble attempt and contribution in some measures to present a panorama, understanding, appreciation and challenges on the idea about religion and its application.

It is due to out of context thinking in every domain of religion, human race has been confused in its application of true religion; expression of what is right and what is wrong, where and how God plays the role in every religion, has extinguished our rightful way of wisdom towards application of religion.

The word “Religion” has been misinterpreted in its true inner understanding. In the recent modern way of thinking, it has laid lot of superstitious faith, belief on a particular identification of religion, over stressed focus on God/s one-sided specific views and competitive nature of compulsion, which if by following is considered is the best form of a religion. This is not true understanding about religion.

The basis of “True Religion’ is Faith and Belief, but ill feelings, hatred, competitive nature of compulsion etc. over religion monopoly have aroused differences within the concept of religion. Due to misinterpretation of word ‘Religion” has led common man gone against the domain of true religion. Religion needs higher understanding with proper analytical study, not just superstitious belief.

Let’s understand it from scratch in this book “All about The Religion” All views are personal but done through research with a purpose to enlighten a true seeker and an idea propagated towards right understanding in application of religion. Hoping this shall bring an absolute change of views to what is religion is all about.

Hello Friends,
